CLUB WASHER MOUNTING OPTIONS

## ***Make golfers feel welcome.***

Golfers notice on-course seating. That's especially true for seniors and walkers. A bench invites players to sit and enjoy the view while the fairway or green clears, and while playing partners tee off. With adequate seating, everyone feels welcome. ***Because Golfers Notice.***

Shown stained with Sashco™ Natural Stain and clear top coat.

Northern White Cedar is an old growth fine grain log species that flourishes in the cold wet climate of Northern Minnesota. The tight grain minimizes splinters or checking that can happen when exposed logs weather. The natural resins and oils in cedar resists insects, rot and decay. The heartwood is a beautiful tan color that has a deep rich hue when a stain or oil is applied.

### **White Cedar Log Bench**

Log benches have been used on golf courses since the beginning of the game. The White Cedar Log Bench provides the ultimate in durability, while giving your course a unique and timeless look. Each bench is uniquely custom-made and comes unfinished.

**SUPER TIP**

Perfect seating for 2 on any tee box. Lightweight and easy to move.

The durable Legend Series of Teak Benches come unfinished and are meant to weather naturally, to a silver/gray patina, enhancing the beauty of the wood. These comfortable benches will dress up your course and last for years to come.

**BIG CUP**

Leaders in the golf industry including manufacturers and publications are advancing the idea of using Big Cups to grow the game of golf. It's undeniably a great way to attract beginner and junior play. And when used in special events, it can re-attract golfers who may have left the game.

The Big Cup can be used alone, or it can be used in tandem with a regulation cup. By providing these two targets, inexperienced players can play in the same group with more experienced players.

Par Aide offers everything needed for Big Cup Golf, from cups to hole cutters to special tee markers and flags.

**400 DENIER FLAG COLOR OPTIONS**

**THE ONLY FLAGS TO FLY**

Better materials, superior workmanship and faster delivery make our custom flags a better choice for your course. Par Aide embroidered and custom screen-printed flags offer:

- Color-protected fabric for maximum resistance to fading.
- Colorfast thread, specifically designed for outdoor use.
- Reinforced stitching.
- Your choice of tube-style or tie-style (with grommets) – Jr. Flags available in tube-style only.

Our embroidered flags offer:

- 400 denier nylon – this durable, heavyweight fabric resists puckering to give your flag a better appearance. Also very popular with screen printing.
- Exclusive “reverse-bobbined” stitching that provides extraordinary detail on both sides of the flag and eliminates unsightly white threads.
- 2-3 week turnaround time from receipt of approved order.

Our custom screen-printed flags offer:

- 200 denier nylon – this durable fabric is recommended for non-embroidered flags.

**LET’S TALK ABOUT YOUR ARTWORK BEFORE WE GET STARTED**

Good artwork is essential to get the process started. To accurately price your logo for embroidered or screen-printed custom flags, provide us with an example of your logo. High-resolution vector-based artwork is the best example of your logo. Low-resolution artwork can be used but will require an additional art charge.

**ORDERING PROCESS: HIGH QUALITY IS ALWAYS IN STOCK**

From start to finish, our step-by-step process makes it easy and convenient for you.

1. Acquire artwork. You need the correct artwork of your logo before we can start.
2. Select flag. Determine flag style, colors and quantity. Twelve-flag minimum for embroidery. Nine-flag minimum for screen printing.
3. Contact Par Aide dealer. Work with your local Par Aide dealer to facilitate a price quotation.
4. Approve quote. Once a purchase order is received, a sample flag or JPEG file will be sent for logo approval when needed/requested. Contact your Par Aide dealer directly if any changes need to be made.
5. Experience the fastest turnaround. Once we have final logo approval, please allow 2-3 weeks for turnaround time.

## Wave them in.

A flag works hard. It communicates the location of the hole, the strength and direction of the wind, and the Superintendent's dedication to great course conditions. So be sure its color is strong and its edges stay sharp as the line where the fringe meets the green. **Because Golfers Notice.**

- Engineered to maintain their good looks despite long exposure to wind and sunlight.
- Improved fade-resistant colors.
- Stronger stitching ensures durability in high winds.
- Lightweight 200 denier nylon construction makes flags sensitive to gentle breezes, giving a better determination of wind direction.
- Heavier-construction, 400 denier flags provide maximum durability.
- Tube-style and tie-style flags are available.

First, the cooler spigot needs a quick conversion to the Safe-Tee Water fill-and-dispense system pinch valve spigot. Then it's a simple process. The Safe-Tee Water fill-and-dispense system is designed to work with ten-gallon insulated coolers. The fill system consists of a coupler that attaches to a dedicated water supply, a hose and adapter that connects to the liner's fill tube. Safe-Tee Water spigots are ordered separately. They fit on the most common brands of coolers, easily replacing the original spigots. One-use sanitary liners are available in quantities of 200.

**AWAY WITH GEESE – A LONG-TERM SOLUTION**

Our safe, humane, environmentally friendly goose-repelling system wins over more Superintendents every year. The unit is solar-powered and emits an amber-colored light, disrupting the sleeping pattern of geese, ultimately encouraging them to move to a new location. It also keeps geese from congregating during molting season, migration and many other times of the year. A single unit effectively protects an area of four acres, working continuously each night with no maintenance. For added durability, Away With Geese offers a one-piece rotomolded design, using fade-resistant ABS plastic. This improves the look of the device while making it impervious to any kind of abuse and able to stay in water year-round. There is simply no other method available that measures up in effectiveness, safety, cost or reliability.

- When Away with Geese is used over the course of 1-2 seasons, you will notice a dramatic decrease in goose population on the ponds you equip with this product.
- Please note: While Away With Geese will be very successful as part of a long-term solution for geese control, results may vary as it is impossible to predict how each individual goose will react to this system.
- Replacement parts available. Contact dealer for details.

**SUPER TIP**

Start with key ponds and expand from there.

Has an effective range of at least 75 yards in any direction (up to 4 acres).

Some pond shapes may require more units to provide complete line-of-sight coverage.

To go one step further than our competitors, we're offering a safer formulation. Keep your greens in shape with this durable, easy-to-use tool. Our Green-Saver quickly repairs ball marks with one simple step. It uses an eight-prong design that moves from the outside of the ball mark to the inside. A simple press of the handle sends the first set of four prongs into action. Then the second set enters the turf at an angle and closes the turf around the ball mark. The base acts like a tamp to flatten the newly repaired area, leaving a smooth putting surface.

Features include:

- Stainless steel parts.
- Self-lubricating bushing.
- Precision laser-cut components.
- Removable tabs on housing that allow for easy cleaning by flushing with water.

**Nobody likes a broken rake.**

Splintered handles, missing teeth and loose heads not only reflect poorly on your course, they make it hard for golfers to rake out bunkers. Annual checks and replacement of worn rakes keeps your supply in top condition and helps you avoid the expense of replacing them all at once.

**Accuform AccuSeed**

The Accuform AccuSeed is the perfect spot seeding tool. There is minimal impact to the surface, due to the flat surface of the seed housing, which causes little disruption to play. 43 in. tall (109 cm).
