CLUB WASHER MOUNTING OPTIONS

A welcome break. On-course seating is appreciated. That's especially true for seniors and walkers. A bench invites players to sit and enjoy the view while the fairway or green clears, and while playing partners tee off. With adequate seating, everyone feels welcome.

Because Golfers Notice.

WHITE CEDAR LOG BENCH

Northern White Cedar is an old growth fine grain log species that flourishes in the cold wet climate of Northern Minnesota. The tight grain minimizes splinters or checking that can happen when exposed logs weather. The natural resins and oils in cedar resists insects, rot and decay. The heartwood is a beautiful tan color that has a deep rich hue when a stain or oil is applied.

White Cedar Log Bench

Log benches have been used on golf courses since the beginning of the game. The White Cedar Log Bench provides the ultimate in durability, while giving your course a unique and timeless look. Each bench is uniquely custom-made and comes unfinished.

BIG CUP GOLF

Use Big Cups (8 in. or 15 in.) to grow the game of golf. It's undeniably a great way to attract beginner and junior play. And when used in special events, it can re-attract golfers who may have left the game.

A Big Cup can be used alone, or it can be used in tandem with a regulation cup. By providing these two targets, inexperienced players can play in the same group with more experienced players.

Par Aide offers everything needed for Big Cup Golf, from cups to hole cutters to special tee markers and flags.

Accuform® AccuSeed™

The Accuform AccuSeed is the perfect spot seeding tool. The specially designed stainless steel spring loaded spikes puncture the turf 5/16 in. deep while dropping bent grass seed precisely into the holes, allowing for ideal seed to soil contact. Grass seed is easily filled into the black housing and is only released when the spring-loaded head compresses. There is minimal impact to the surface, due to the flat surface of the seed housing, which causes little disruption to play. 43 in. tall (109 cm).

A flashing light disrupts their sleeping pattern causing them to move to another location.
