To Our Valued Customers & Those We Have Not Yet Done Business With –

We are extremely excited that you have received our **brand new 2019 catalog**. This past year we have been working to completely redesign, reorganize and improve both our catalog and our products so that they are all better fit for you and your facility. Inside you'll find everything from range and course equipment, maintenance supplies, pro shop and mini golf supplies and several brand new, comprehensive furniture collections.

Since 1946, Wittek Golf has been known as the leading range and golf course supplier in the industry, and we have yet to slow down since. Inside this catalog you will find new products, improved products, and everything you need to keep your facility running smoothly. Even better than that, everything inside these pages can be **ordered online, 24/7 on our online store**.

In 2016, we acquired Delta Golf, to provide you with the highest quality and best priced rental clubs on the market. **In 2017, we acquired Eagle One**, which gave us the ability and capacity to create unmatched recycled plastic furnishings for your course, range and outdoor areas. At our Los Angeles location, we manufacture flags, signage and everything recycled plastic, meaning you can customize almost anything to your liking. In our Chicago location, we manufacture our ball washers, pickers, dispensers, flagsticks and more. Having two manufacturing and distribution locations means that if you order something before 1 PM and it's in stock at one of our locations, **it ships out the same day**.

As always, let us know how we can serve you and your business. We are always looking for new ways to improve and grow our business, and it starts with hearing how we can help you improve yours. Thank you for your business in the previous years and the opportunity to serve you. We look forward to continuing to grow our business with you in the years to come.

Sincerely,
Gene and Tim Proban

THE KLAW

THE KLAW BALL REPAIR TOOL

Finally a ball repair tool that really works! Made primarily of stainless steel this one-action device not only repairs ball marks properly it does it very fast. By pushing down on the handle, two multi prong teeth first project into the turf in a wedge format. As they go deeper the wedge width closes in and finally towards the bottom of the stroke the teeth become parallel. This intricate series of actions pulls the turf towards itself lifting it back into place. Final tamping completes the repair.

The Klaw performs the most frequently recommended motion to repair ball marks. Repair speed is estimated between 15 - 20 in about two minutes. Great for weaving plugs back into green.
