WANT MORE **SPEED?**

IT'S RIGHT AT **YOUR FEET.**

FJ PERFORMANCE FITTING SYSTEM

A SHOE THAT **FITS YOUR FOOT** IS ESSENTIAL.
A SHOE THAT ALSO **FITS YOUR SWING** IS INVALUABLE.

The FJ Performance Fitting System analyzes individual golfer center of pressure movement and speed of transfer in order to recommend the correct type of golf shoe—**Mobile or Structured**. When fit to the correct shoe, a golfer can **increase driver clubhead speed an average of 3 mph**, or gain an average of **9 yards of additional distance** off the tee.

Mobile shoes are highly flexible and cushiony, providing more freedom of movement in the swing.

Structured shoes, while still offering a level of flexibility and cushioning, are firmer in nature and provide golfers with a more secure, locked-in feel.

Be sure to get fit on the FJ Performance Fitting System to determine what shoe is best for your particular swing.
